

METHOD AND SYSTEM FOR RESOLVING SWITCH NUMBER
CONFLICTS IN A STACKABLE SWITCH SYSTEM

ABSTRACT OF THE DISCLOSURE

A method for resolving switch number conflicts in a stackable switch system includes communicating a message between switches in the stackable switch system and
5 determining, based on the communicated message, that two or more switches in the stackable switch system have the same switch number. The method also includes, in response to the determination that two or more switches have the same switch number, determining whether any of
10 the switches should keep the switch number or select a new switch number.
